# Preface

iSEE is a Bioconductor package designed to create interactive web-applications for exploring biological assays. This book covers essential knowledge for users interacting with the graphical user interface, developers of web-applications using iSEE to showcase data sets, and developers of extensions contributing new functionality to the iSEE ecosystem.

# 1 Introduction

This book compiles essential knowledge about the Bioconductor package iSEE.

See Rue-Albrecht et al. (2018) for the original publication.

This book caters for three major categories of users:

- Users interacting with the graphical user interface.
- Developers of web-applications using iSEE to showcase data sets
- Developers of extensions contributing new functionality to the iSEE ecosystem.
